

## Price Schedule - Effective Date: 1<sup>st</sup> September 2009

Reference	Description	License type	Fee (GB£, US\$, EURO€)*		
LS02	LimitState:GEO 2.0 software <sup>1</sup>	Renewable (node locked)	£1,950	\$3,150	€2,200
LS02-M	1 year support & maintenance for LS02 above	-	£390	\$630	€440
LS03	LimitState:GEO 2.0 software <sup>1</sup>	Renewable (network)	£2,730	\$4,410	€3,080
LS03-M	1 year support & maintenance for LS03 above	-	£545	\$880	€615
LS04-L12	LimitState:GEO 2.0 software <sup>2</sup>	Leased (12 month node locked)	£1,365	\$2,205	€1,540
LS04-L6	LimitState:GEO 2.0 software <sup>2</sup>	Leased (6 month node locked)	£975	\$1,575	€1,100
LS05	USB Dongle (for LS02 / LS03 / LS04)	-	£50	\$80	€55

<sup>1</sup>A valid support and maintenance contract is required to use LimitState:GEO

<sup>2</sup>Leased licenses include support and maintenance

### Brief description

LimitState:GEO is a single product solution for geotechnical stability analysis, applicable to many types of problem, including slopes, gravity retaining walls and foundations.

### Licensing principles

- The above prices are for single-user licenses. The software can be installed on as many computers as required but the number of licenses purchased should equal the number of computers which can simultaneously run full versions of the software.
- LimitState:GEO licenses are granted for a maximum length of one year, with replacement licenses then made available electronically. Renewable licenses are updated annually upon payment of the appropriate maintenance fee (see below).

### Renewable Licenses

Renewable licenses are the main type of license offered by LimitState and involve a one-off purchase cost for the software and also an annual fee for support and maintenance. After the initial 12 month period has elapsed, licenses are extended for a further 12 months provided the appropriate support and maintenance contract is continued (a valid support and maintenance contract is required to use the software as it ensures that all customers have access to features in the latest version of the software and also to support, if required).

Example (LS02 – LimitState:GEO, single, renewable (node-locked) license)\*:

Year	Fee
1	£1,950 + £390 (renewable license + support & maintenance)
2	£390 (support & maintenance)
Subsequent	£390 (support & maintenance)

\* Current prices - may be subject to change.

### Leased Licenses

Leased licenses, which include support and maintenance for the duration of the license, are also available. Note that leased licenses have fixed duration and are non-convertible (i.e. a short term leased license cannot be converted into a longer term leased licenses, or into a renewable license).

## Node locked Licenses

Node locked (or *standalone*) licenses are generally secured to the hardware of a single PC. USB dongles are also available (see below).

## Network Licenses

LimitState recognises that the internet is allowing engineers to work closely with colleagues even if they are separated geographically. Therefore our network licenses are suitable for both Local Area Network (LAN) and Wide Area Network (WAN) use. However, to ensure equitable usage, and also to allow our customers to prioritise who should have access to licenses at any given time, a single user network license can only be accessed by one out of a maximum of 5 named users at any time. The list of named users can be freely changed - using a simple web-based interface - but changes require 24 hours to take effect.

## Roaming Licenses

Network licenses can be converted into node-locked licenses for short periods using the 'license roam' feature. (This is useful when working away from the office.)

## USB Dongles

USB Dongles, which allow a standalone license or network license server to be transferred between machines, are available for a small additional cost. If immediate access to LimitState:GEO is required, a temporary license can be provided whilst the USB dongle is prepared and posted.

## Volume Discounts

Volume discounts are applicable as follows:

- 3 or more licenses (purchased at the same time): 20% off
- 5 or more licenses (purchased at the same time): 25% off

## Small Business Discounts

For companies with 2 engineers or less, small business discounts are available as follows:

- Micro discount (2 engineers): 30% off
- Sole practitioner discount (1 engineer): 60% off

## Academic Licenses

LimitState is committed to providing University researchers, teachers and students with easy access to its state-of-the-art software. For further details see: [www.limitstate.com/academic](http://www.limitstate.com/academic)

## Countries with low GDPs

LimitState has a policy of offering reduced price licenses to organizations based in countries with low GDPs. For further details see: [www.limitstate.com/international-discounts](http://www.limitstate.com/international-discounts)

## Value Added Tax

The prices shown are exclusive of Value Added Tax, which will be added in accordance with prevailing legislation.
